

Equity Research Nairobi, Kenya or Lagos, Nigeria

Package: £80-150K + bonus

Location: Nairobi, Kenya or Lagos, Nigeria

Summary:

Sub Saharan Africa is one of the fastest growing regions in the world – ahead of the US, EU and even Asia.

An opportunity exists for experienced Equity Research professionals to join this growth story either in Lagos, Nigeria or Nairobi, Kenya.

Job description:

One of the biggest banks in the Sub-Saharan African space is expanding their presence in the Equities arena in Nairobi as well as Lagos.

They are looking to add Equity Research professionals with experience in emerging markets, preferably but not necessarily from Africa. Recently, Equity specialists with Asian or Latin American experience have crossed over into the African space with great success, and therefore senior emerging markets equities research specialists are encouraged to get in touch.

The equities business in Africa is still in its infancy and hence functions are less defined and sometimes overlapping. Therefore, people who are experienced in more than one function and/or asset class are especially sought after.
